Faulting and Folding Video

- The process that is faulting and folding is so slow that people:
are unaware that change is taking place below the ground.
- What city knows first hand about the forces that shake the earth and change lives
San Francisco
- On October 17, 1989, Northern California was rocked by a powerful earthquake
- What happened to the earth? (4) pavement buckled, grates bent, buildings collapsed, earth's ~~was~~ plates were moving.
- The forces that shape the earth's crust is called faulting and folding
- Folds ^{in the earth} make Mountains
- Faults can cause Earthquakes
and Lakes
-
